

The background of the page is a dark blue gradient. On the left side, there is a large, abstract shape composed of several overlapping geometric forms: a large dark blue triangle, a smaller orange triangle, and a white circle. Overlaid on this shape are various financial charts. At the top left, there is a candlestick chart with white and blue bars. Below it, there is a line chart with a blue line and a red line. At the bottom left, there is a bar chart with blue bars. The overall design is modern and professional, with a focus on financial data and trading.

**Kapil Shah**  
Technical Analyst

# Overview of the course

Price action is the movement of a security's price plotted over time. Price action forms the basis for all technical analyses of a stock, commodity, or another asset chart. Price Action provides simplicity in a trader's decision-making process, with a focus on limited data points, without the use of many technical indicators. The idea of this course is to introduce you to the world of price action and building an understanding for successful execution.

## What will you learn?

- Master Technical Analysis Indicators, Oscillators, Chart Patterns & Candlestick Patterns With Real World Examples
- How to Build a Strong Technical Analysis Foundation For Stock, Options, Forex & Crypto Trading
- How to Trade Single Candlestick Patterns

# Live Market Webinars

In our endeavour to ensure that your learning is as application focused as possible, we have designed a variety of live market webinars to bridge the gap from the textbook and build your confidence to independently take trades.

Via the following webinars, we aim to build your knowledge for a range of scenarios -

## Weekly Webinars

conducted every Friday, this series is designed to ensure you're able to apply theoretical concepts successfully. These sessions are used to solve doubts, case studies and fine-tune your learnings, with focus on Nifty / Bank Nifty

## Sunday Webinars

given the global nature of Nifty / Bank Nifty, taking direction and analysing the major global indices is key for a trader. These sessions are conducted once every two weeks, allowing you to take direction and prepare for the coming week.

## Live Trading Labs

conducted on Tuesdays & Thursdays, as the name suggests, it's all about hand-holding and ensuring you're best prepared to trade independently. Topics covered include-

- Current Market Analysis of Nifty, Nifty Bank, Stock – Future & Options
- Real-life example of a script showing
- Where to Buy. Where to Go Short
- How to set target & stop loss
- Trade Plan
- Option Strategies
- Understating The Risk

# Trading & Analytics Platform

As a part of the course, and in order to aid your learning experience, we have developed a comprehensive Trading & Analytics platform, EmTrade. This platform is provided as part of the course.

## Some key features include-

- Intraday Strategies
- Swing / Positional Strategies
- Real-Time Data
- Extensive Oscillators Library
- Options Strategies
- Extensive Company Financials
- Global Indices
