# Overview of the course

The world of intraday trading is one that excites us all. Suited to market participants with time & energy on their side, intraday traders spend a majority of their day in front of the screen, taking multiple trades, with a short holding period and quick square offs. The idea of this intraday trading course is to educate you on taking intraday trades in a professional and risk-averse manner, protecting & growing your capital in a structured way.

## What will you learn?

- Scalping Techniques (Holding trades for 5-15 minutes)
- Momentum Based day trading set-up
- Retracement Based Day Trading Set-Up
- Position Sizing
- Risk Management
- EmTrade Pro- proprietary strategy for day traders
- Sector Rotation Analysis
- Learning how to trade the opening hour

## Benefits

- You will be able to short-list scripts across sectors
- You will understand the psychology of price/volume spikes and drops and recognize patterns.
- You will gain the ability to analyze the market at every stage of your trading journey.
- You will be able to understand specialised day trading strategies for long term use.

## Requirements

- Basic Understanding of Technical Analysis
- Basic Understanding of Stock Market Terminology
- Exposure to Trading & Charting Platforms

## Intraday Trading is ideally suited for-

- Participants willing to dedicate ~2-4 hours per day to trading
- Easy access to trading & charting platforms in the day

# Content

This is a live market course, with emphasis on execution. Pre-Market opening sessions are conducted thrice a week wherein scripts are identified basis global, sectoral and technical analysis, discussed with you and accordingly actioned upon. You can view a preview of the sessions to get a better understanding of the structure of the course.

## Live Market Webinars-

In our endeavour to ensure that your learning is as application focused as possible, we have designed a variety of live market webinars to bridge the gap from the textbook and build your confidence to independently take trades.

Via the following webinars, we aim to build your knowledge for a range of scenarios -

### **Sunday Webinars -**

given the global nature of Nifty / Bank Nifty, taking direction and analysing the major global indices is key for a trader. These sessions are conducted once every two weeks, allowing you to take direction and prepare for the coming week.

### **Live Trading Labs-**

conducted on Tuesdays & Thursdays, as the name suggests, it's all about hand-holding and ensuring you're best prepared to trade independently. Topics covered include-

- Current Market Analysis of Nifty, Nifty Bank, Stock – Future & Options
- Real-life example of a script showing
- Where to Buy. Where to Go Short
- How to set target & stop loss
- Trade Plan
- Option Strategies
- Understating The Risk
- Combining Technical & Options for trade setup

# Trading & Analytics Platform

As a part of the course, and in order to aid your learning experience, we have developed a comprehensive Trading & Analytics platform, EmTrade. This platform is provided as part of the course.

## Some key features include-

- Intraday Strategies
- Swing / Positional Strategies
- Real-Time Data
- Extensive Oscillators Library
- Options Strategies
- Extensive Company Financials
